DETAILED ACTION

The applicant's response filed December 01, 2006 in responding to the previous action has been issued on September 21, 2006 regarding to elective claims 25-48 and 59-64 selected on June 26, 2006. However, the selective claim invention is still holding more than one invention, therefore, a need of restriction requirement has been provided toward the current selective claims 25-48 and 59-64. Accordingly, claims 1-69 are currently pending in the application, claims 1-24, 49-58 and 65-69 have been withdrawn while claims 25-48 and 59-64 are under a new restriction requirement.

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention.

Species 1, claims 25 and 37;

Species 2, claims 59;

Species 3, claims 26-33, 38-44;

Species 4, claim 60 and 61;

Species 5, claims 34-36 and 45-48; and

Art Unit: 2821

Species 6, claim 62-64.

Species 1 and 2 relate as combination and subcombination, wherein the claim 25 is generic related to Species 1 and 2.

Species 3 and 4 relate as combination and subcombination, wherein the claim 26 is generic related to Species 3 and 4.

Species 5 relates to Species 1 and 2 as mutually exclusive species while relating to Species 3 and 4 as subcombinations usable together.

Species 6 relates to all species 1-5 as subcombinations usable together.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Applicant is advised that a reply to this requirement **must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.** An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP j 809.02(a).

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 2821

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that **the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case.** In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
